

## Interior Glass Installations

Custom &  
Collaborative  
Design

### BSK Design

is Barbara Shulman-Kirwin's line of functional architectural glass that adds color and elegance to each environment.

BSK design is *simple and contemporary* – using the power of vibrant and iridescent color. Every custom design illuminates each space with a unique combination of art and function.

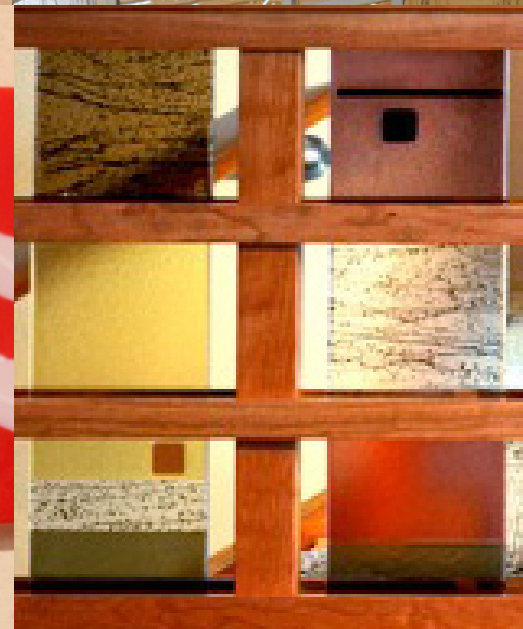

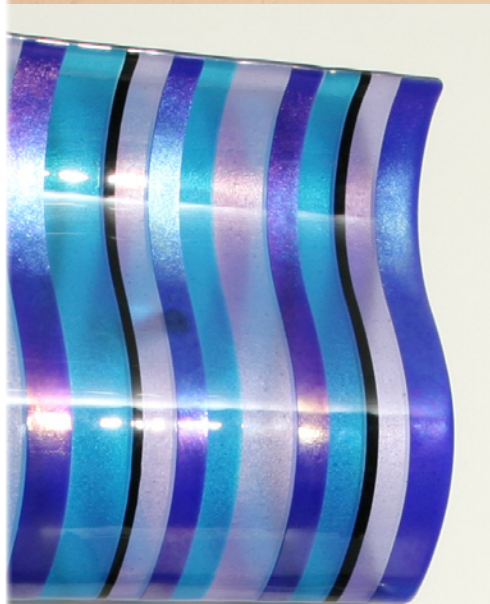

Barbara enjoys the collaboration with architects, interior designers, space planners and contractors, to create one-of-a-kind custom fused glass design.

## Installation 2

### ■ Custom & Collaborative Design

Foyer entrance

■ **Description of project:**  
The design concept of this installation was to create a glass panel with a dual purpose. From the foyer, it serves as a stand alone glass sculpture with its play of glass shapes, colors and various transparencies. From the kitchen, the piece carefully blends with a variety of existing materials, colors and fixtures, and is the main focal piece.

■ **Materials:** Fused glass, two laser-cut stainless steel frames.

■ **Dimensions:** Panel 48" x 38"
